

CHCA Director of Parks
Report to AGM

I assumed this position at the May 2017 Board meeting so have held the post for approximately 4 months.

During my time on the Board I have begun working on the following items:

1. Exploring, with other Board members and engaged community members, the possibility of incorporating in our parks the following items: a neighbourhood bulletin Board; poo bag dispensers; additional signage for off-leash areas; a water fountain.
2. Exploring ways to reduce conflicts of uses in our parks and increase education of park users in sharing the spaces for their multiple uses.
3. Initiated a request with the Ward and the Board that issues and conflicts relating to McHugh Bluff and it's uses be addressed in a comprehensive way. Identification of opportunities and constraints and long term planning for the success of the space for all uses is my goal.
4. Working with City Parks to achieve the above items.

As a member of the Board I would continue to work towards these goals over the next year.
